1 MISSION MISSION

.LA STORIA DI TIEMME LA FORZA DEL GRUPPO GNUTTI CIRILLO

TIEMME è leader internazionale nel settore della produzione e commercializzazione di articoli idrotermosanitari. Nata negli anni '80, l'azienda conosce una svolta radicale nel 1994, quando entra a far parte del Gruppo Gnutti Cirillo - una delle principali realtà dell'imprenditoria bresciana sin dagli anni '50 -, che detiene l'intera filiera tecnico-produttiva, trasformando la materia prima in prodotto finito e pronto per essere commercializzato. Così, in netta controtendenza rispetto all'ormai affermata cultura della delocalizzazione del ciclo produttivo e dell'outsourcing, TIEMME realizza all'interno dei propri stabilimenti tutte le lavorazioni ed ogni componente della propria gamma di prodotti, concentrandosi non solo sulla loro qualità e sull'eccellenza tecnologica e produttiva, ma puntando su una produzione eco-compatibile, ossia dall'impatto ambientale il più contenuto possibile. Pur operando con successo a livello internazionale attraverso filiali e uffici in tutti i continenti, TIEMME rimane un'azienda fermamente italiana e fortemente legata al proprio territorio. Mantenendo con orgoglio tutta la filiera produttiva sul territorio nazionale, TIEMME garantisce l'alta qualità e l'indiscutibile sicurezza ed affidabilità dei suoi prodotti e sistemi.

TIEMME'S HISTORY THE POWER OF GNUTTI CIRILLO GROUP

TIEMME is an international leader in the production and marketing of HVAC and plumbing fixtures items and systems. Established in the '80s, the company boasts a radical turning point in 1994, when it joined the Gnutti Cirillo Group, one of the leading companies in the Brescia business since the '50s, which holds the entire technical-production chain, transforming the raw material into a finished product ready to be marketed. Hence, in sharp contrast with the now-established culture of delocalization of the production cycle and of outsourcing, TIEMME realizes in its factories all the processes and every component of its product range, focusing not only on their quality and on technological and productive excellence, but aiming at an eco-compatible production, namely with the lowest possible environmental impact. Although operating successfully internationally through branches and offices on all continents, TIEMME remains a firmly Italian company moreover strongly linked to its territory. Maintaining the whole production chain on the national territory with pride, TIEMME guarantees the high quality and the unquestionable safety and reliability of its products and systems.

.TIEMME OGGI

Situata a Castegnato, in provincia di Brescia, TIEMME opera in due stabilimenti adiacenti. Nel primo, di circa 10.000 mq coperti, sono situati produzione, uffici e la divisione Sistemi che offre un efficiente servizio di progettazione e di consulenza impiantistica. L'altro, che copre una superficie di oltre 25.000 mq, ospita un moderno polo logistico a basso impatto e l'ampio reparto per la produzione dei tubi multistrato, PE-X (polietilene reticolato) e PPR (polipropilene Random). Esperienza e capacità di innovazione, grande creatività e produzione esclusivamente Made in Italy, cura nel servizio e rispetto per l'ambiente sono i punti di forza che caratterizzano le soluzioni per l'impiantistica termoidraulica di TIEMME, perfetta combinazione di competenza tecnica ed eccellenza produttiva. La costante attività di ricerca e ampliamento della gamma permette all'azienda di proporre nuove possibilità applicative dei prodotti idrotermosanitari, fornendo agli operatori del settore soluzioni per l'impiantistica sempre più ampie, puntuali e dalle elevate caratteristiche tecniche. Con questa cura e visione imprenditoriale, TIEMME propone oggi tredici nuove collezioni di rubinetteria cromata per ambienti bagno - interamente prodotte nel nuovo stabilimento da 5.000 mq di Torbole Casaglia (Brescia) - che racchiudono ed esaltano tutta la tecnica, la competenza e l'esperienza sviluppata negli anni. Le materie prime utilizzate e i trattamenti galvanici rispettano pienamente l'ambiente e sono interamente Made in Italy.

TIEMME TODAY

Headquartered in Castegnato, in the province of Brescia, TIEMME operates in two adjacent plants. In the first one, covering approximately 10,000 square metres, are located the production department, the offices and the Systems division, offering an efficient design and plant engineering advisory service. The other one, which covers an area of over 25,000 square metres, houses a modern low-impact logistics hub and a large department for the production of multilayer tubes, PE-X (cross-linked polyethylene) and RPP (Random polypropylene).

Experience and ability to innovate, great creativity and exclusively Made in Italy production, care in service and respect for the environment are the strengths featuring the solutions for TIEMME HVAC and plumbing fixture plant engineering, a perfect combination of technical expertise and manufacturing excellence. The steady research and expansion of the product range allows the company to propose new application possibilities for HVAC and plumbing fixture products, providing industry operators with high technical feature solutions for more and more extensive and exact plant engineering. With this care and entrepreneurial vision, today TIEMME offers thirteen new collections of chrome-plated tapware for bathrooms - entirely manufactured in the new 5,000 sqm factory in Torbole Casaglia (Brescia) -, which embody and enhance the whole technique, expertise and experience developed over the years. The raw materials used and the galvanic handling fully respect the environment and are entirely Made in Italy.

Una efficiente e moderna assistenza formata da tecnici addestrati è completamente a disposizione della clientela. TIEMME propone una gestione più efficiente dell'acqua in ambito domestico, considerandolo elemento vitale. La protezione del clima inizia da semplici azioni quotidiane quali il farsi la doccia o lavarsi le mani. Alle imprese che operano nel settore sanitario, viene chiesto di promuovere innovazioni che consentano notevoli risparmi idrici ed energetici, senza tuttavia limitare il comfort e la qualità della vita. TIEMME ha imposto un nuovo standard per tutti i suoi miscelatori, introducendo un innovativo rompigitto in grado di ridurre il flusso dell'acqua del 30% grazie alla combinazione di limitazione del flusso e arricchimento dell'acqua. Inoltre, con la sua innovativa tecnologia green propone articoli ecologicamente qualitativi.

TIEMME Quality Management System is the utmost tool to guarantee customers products and services that meet their expectations of constant quality at the highest level and timely delivery, in a process of continuous improvement, in full respect of safety and the environment. TIEMME obtained in 1999 the ISO 9002 certification of its Quality Management System and in 2003 the ISO 9001 certification, a natural consequence of the overall quality policy and the attainment of the excellence, which has always been pursued by the company. An efficient and modern service formed by trained technicians is fully available for our customers. TIEMME proposes a more efficient management of water in the domestic sphere, considering the relevant consumption as a vital element. Climate protection starts with simple daily actions such as taking a shower or washing your hands. Companies operating in the fixture sector are asked to promote innovations that allow significant savings in terms of water and energy, without limiting comfort and quality of life. TIEMME has implemented a new standard for all its mixers, introducing an innovative flow regulating nozzle designed to reduce water flow by 30% thanks to the combination of flow limitation and water enrichment. In addition, with its innovative green technology we offer ecologically qualitative items.

.WATER ED ENERGY SAVING SYSTEM

Tiemme propone una gestione più efficiente dell'acqua in ambito domestico considerando in particolare l'utilizzo dell'acqua come elemento vitale. La protezione del clima inizia da semplici azioni quotidiane come per esempio lavare le mani. Per promuovere il risparmio idrico ed energetico, Tiemme ha imposto un nuovo standard per i suoi miscelatori, introducendo cartucce monocomando che hanno 2 caratteristiche speciali!

WATER AND ENERGY SAVING SYSTEM

Tiemme offers a more efficient management of domestic water by paying particular attention to the use of water as a vital element. Climate protection begins with simple daily actions such as washing hands. In order to promote water and energy saving, Tiemme has set a new standard for its mixers, by introducing single-control cartridges with 2 special characteristics!

RISPARMIO ENERGETICO

I rubinetti Tiemme aprono al centro dando acqua fredda, l'acqua calda esce solo con una rotazione della leva verso sinistra.

ENERGY SAVING

Tiemme faucets open at the centre and give cold water, while hot water flows only by rotating the lever to the left.

RISPARMIO IDRICO

Per avere più portata d'acqua bisogna vincere una resistenza in apertura (evita sprechi durante l'inconsapevole apertura dell'acqua).

WATER SAVING

It is necessary to overcome an opening resistance in order to have a greater water flow (it avoids any unnecessary consumption during the unaware flowing of water).
